

# JACOB HOFFMAN

347-209-2325  
jhoffma1@andrew.cmu.edu

5320 5<sup>th</sup> Avenue  
Pittsburgh PA 15232

Portfolio Website - <https://jacobhoffman.tk/>

## EDUCATION

---

- Junior at Carnegie Mellon University.
- Computer Engineering Major Class of 2020. 3.52 GPA
- Deans List Spring 2018

## WORK

---

### Paid Research:

- **CMU ECE | Signals Research | Ongoing Since Summer of 2018 | Ultrasonic Positioning Systems**

Professor Sankaranarayanan and I are developing a low cost high accuracy close range ultrasonic positioning system. The invention has potential to impact both navigation for blind persons and precision timing of athletes. Chirps, STFTs, FFTs, are examples of some of the mathematical tools I am using to implement the system. (More information at the url [yardstick.ml](http://yardstick.ml))

- **CMU ISR | Software Research | Summer of 2017 | Data Mining for Automatic Program Repair**

I mined large quantities of data on GitHub, and then contributed this data into professor Bogdan Vasilescu's existing SQL databases in order to be eventually used for automatic program repair. I also analyzed this data in R to verify coding practices which contribute to projects with less errors.

## SKILLS

---

- I can program using C, C#, Java, Python, R, MATLAB, Javascript, HTML, CSS, and SQL.
- I have video, photo, and audio editing experience.

## MERITS

---

### Engineering Pursuits

- **Patenting** : I have a pending patent on a technology for the guitar industry. It is a technology that takes advantage of the resonance of a body of a guitar to allow guitars to double as a bluetooth speaker.
- **Web Development/Entrepreneurship** : I design websites ([jeffteta.tk](http://jeffteta.tk), [jacobhoffman.tk](http://jacobhoffman.tk), [yardstick.ml](http://yardstick.ml), [hoff.ml](http://hoff.ml)). I am a cofounder of Optimist Track NYC along with coach Jeff Teta. My web development skills, and clothing design helped the club grow from 0 to 25 registered athletes this year.
- **Software Development** : I am working on a marketplace for Python code. The motivation for the software is to provide more incentive for casual programmers who only know Python to write and sell their own software. My role in the project is to manage the SQL database and developer security.

### Athletic Achievements:

- Ran an indoor 300m time of 35.19 seconds. 46<sup>th</sup> Fastest in U.S. high schools in 2016
- Tied the CMU 100m school record of 10.7 seconds.
